Web Development Internship at codeclause (Feb,2024-March,2024).

SKILLS

HTML CSS javascript Reactjs Node.js
Express.js SQL Document object Model(DOM)
jquery Data structures Java Python C
Bootstrap

PERSONAL PROJECTS

Chatgpt Clone
- Made a chatgpt clone whose UI is similar to the actual chatgpt used openAI API and integrated local storage , we can ask the chatbot anything,added light and dark mode functionality.

The Simon Game
- Made the Simon game which is kind of a memory game in which the player has to memorize a series of illuminated keys and reproduce it, it's an endless game! I added event listeners, JQuery, and DOM to add the functionality.

Resume Builder Tool
- Made a resume builder tool where user can enter all their details like experience , education, etc and a resume with the specified template will be presented.

CERTIFICATES
